Azuqua
Lead Frontend Engineer
January 2014 - August 2016 (2 years 8 months)
Bangalore

Building an awesome platform to connect different cloud apps and softwares together. We write the code so that our users don't have to!

The Azuqua platform gives everyone (even someone without a technical background) the ability to quickly build their own integrations between cloud-based applications. With Azuqua, you can create processes that automatically share data and updates across any cloud app you use. You aren't limited to two apps either: connect as many apps as you want, and add value to your data along the way using our library of logic and business functions.

Leading frontend development for Azuqua @ Bangalore
Working on Frontend and backend of Azuqua platform.
We are building awesome product using cutting edge web technologies including NodeJS, Microsoft Azure, KnockoutJS, ReactJS, ES6 etc.
